## **Reporting and Analytics Portal**

## **Smartalock System - Mandatory Customer IT Requirements Checklist**

**Dual Power and Dual Data Outlets behind** locker bank at toekick height

All Data Outlets are connected into a "Smartalock" Layer 2 VLAN on Customer LAN switch.

**Reseller can provide a dedicated Smartalock LAN** switch at additional cost if not possible to connect to Customer LAN switch

and Cisco VPN Appliance.

## **Connect Cisco to Smartalock Vlan.**

- Traffic Estimate <2GB/Month
- Speed 4G, DSL or Better
- No Static public IP required
- Ethernet Presentation
- Detailed Security Document available on request

## **2U Shelf and 2x Power in Comms room for** installing the Smartalock Master Controller

Connection goes here

## **Smartalock System - Optional Customer Requirements**

## **Initial Import File of Users and their Card Numbers**

- Excel, CSV or TSV file format
- 3 Columns firstname, lastname, swipe card number
- Card number is either Decimal or Hex
- Card number is the unencrypted CSN number from the building card
- Send Sample cards to Smartalock along with their CSN numbers for compatibility checking
- CAREFUL when using EXCEL for Card numbers over 15 digits
- Laptop card reader available if CSN number not stored in customer system

#### **Initial Locker Allocation**

- via Web Portal or Bulk import in Excel, CSV or TSV file format

- As per initial import file, but add 4th column called "res\_fixed"
- Specify the Locker number allocated including the prefix

## **Locker Policy - Modify System Default Settings**

- Are lockers available on demand or must be pre-allocated to users by Admin?

- Can a user have more than 1 locker at a time?

- If lockers are on-demand, how long should the default reservation last for?

- If lockers are on-demand, can user choose which locker they like or get the system randomly allocated next locker available?

What should happen if a user doesnt open / use their locker for a long time?
Will users be able to use the Smartalock App from Day 1 or enable later on demand?

- Should all initial PIN numbers be set to common number (that user can change) or randomly generated?

# Automate the connection to upload new users and card numbers from external system

- Automate upload of incremental changes from building card system to Smartalock via SCP or HTTP protocols

- Specific API integration available for Gallagher based building access systems

- Detailed documentation available on request
