8x

⚠️ Ensure underside of desk is clear before drilling through.
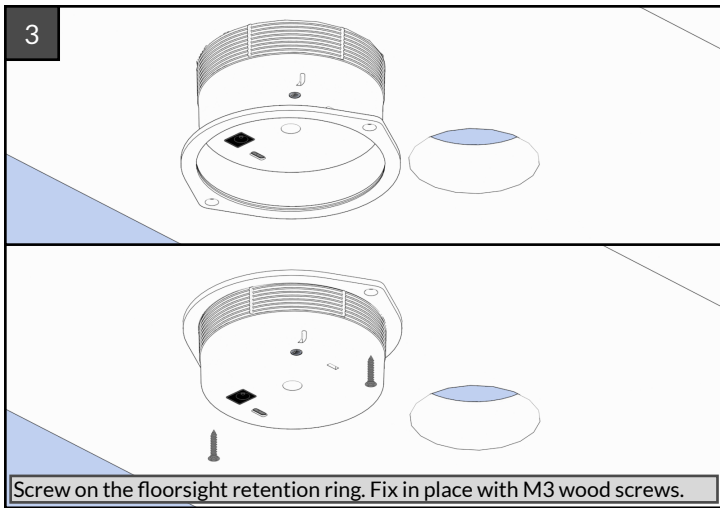

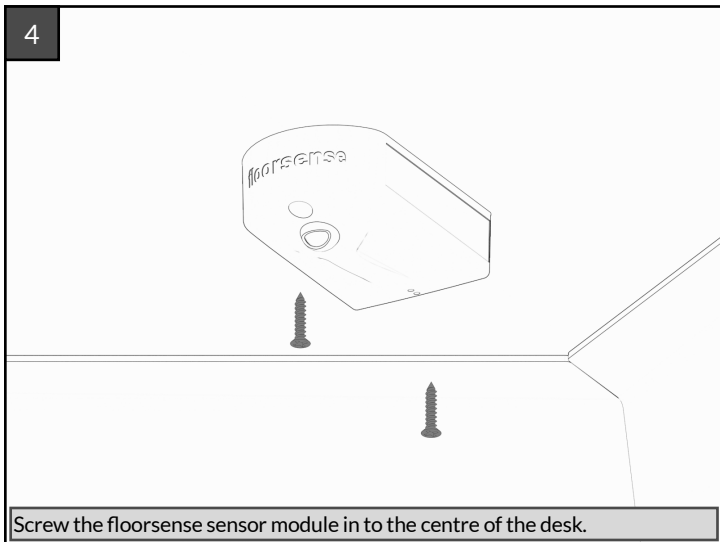

❌ ✅

1

89mm

60 mm

If the desk does not have a pre-drilled hole then you will need to do this with a 3.5 inch holesaw. Press the floorsight module firmly into the hole.

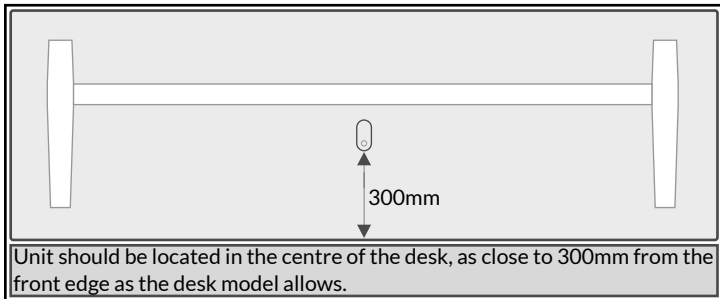

2

Press the floorsight module into the 89mm hole.

⚠️ Avoid moving parts of adjustable height desks
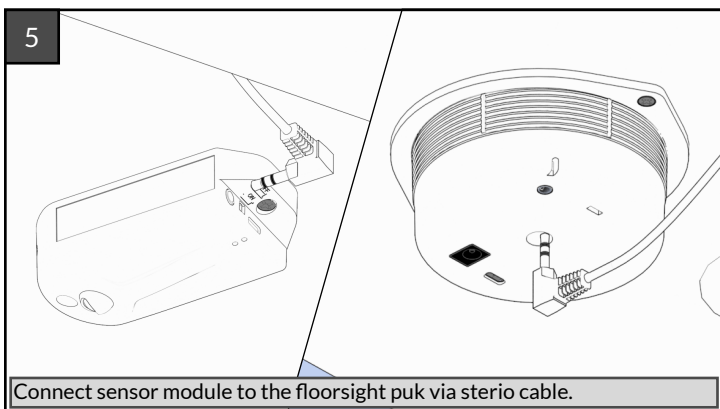

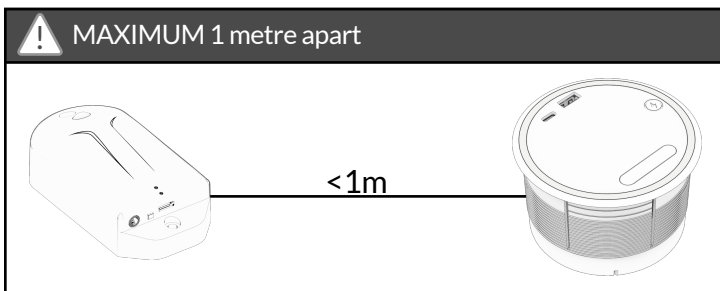

❌ ✅

3

Screw on the floorsight retention ring. Fix in place with M3 wood screws.
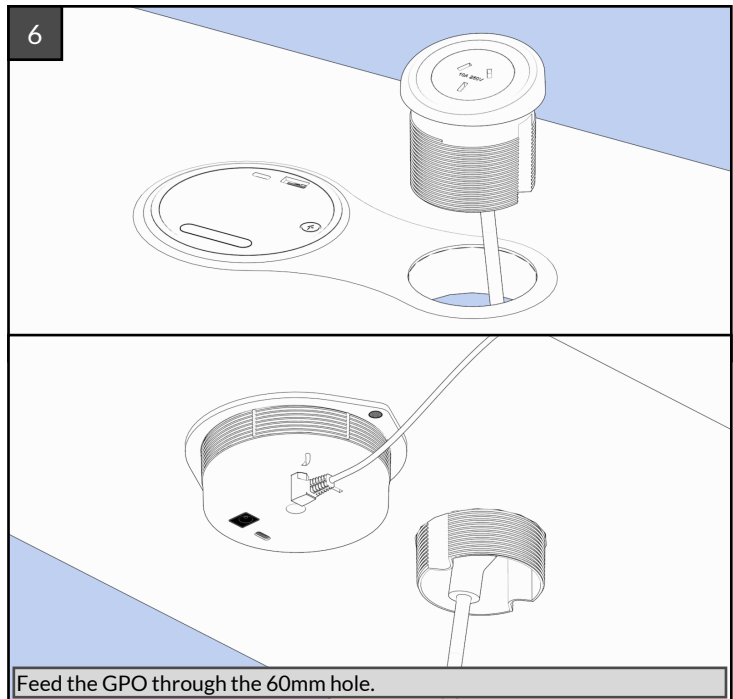

4

Screw the floorsense sensor module in to the centre of the desk.

300mm

Unit should be located in the centre of the desk, as close to 300mm from the front edge as the desk model allows.
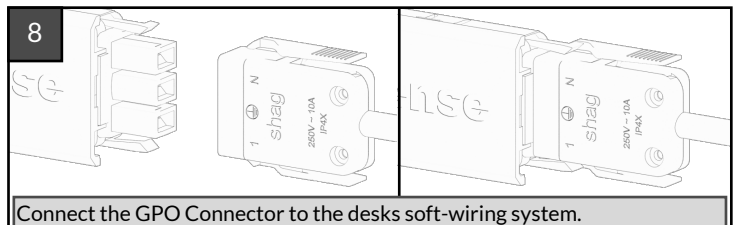

⚠ MAXIMUM 1 metre apart

<1m

5

Connect sensor module to the floorsight puk via sterio cable.
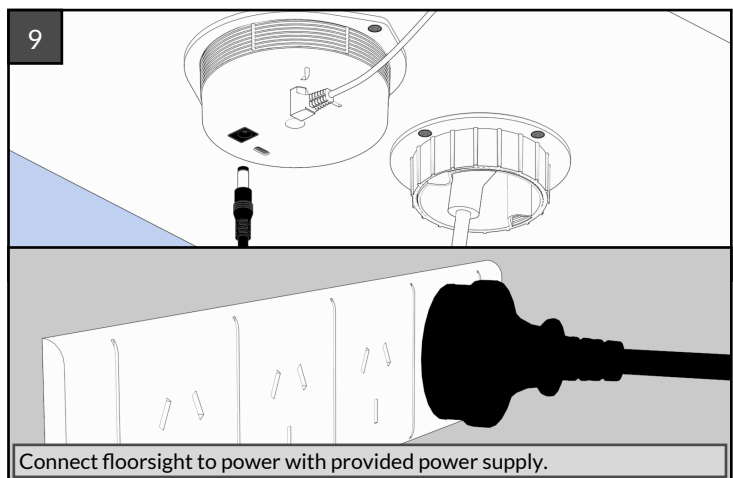

6
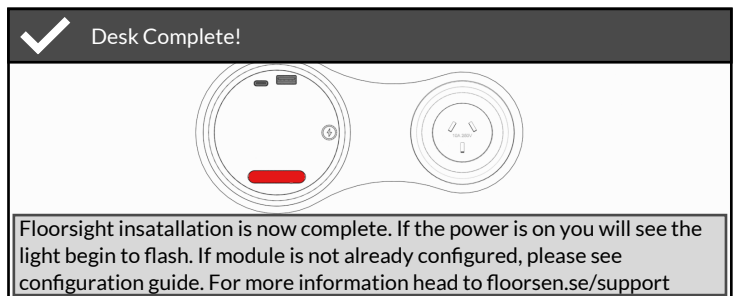

Feed the GPO through the 60mm hole.

7

Firmly screw on the GPO retention ring. Fix in place with M3 wood screws.

8

Connect the GPO Connector to the desks soft-wiring system.

9

Connect floorsight to power with provided power supply.

✔ Desk Complete!

Floorsight insatallation is now complete. If the power is on you will see the light begin to flash. If module is not already configured, please see configuration guide. For more information head to floorsen.se/support
